WELCOME BACK BRENDA!

Brenda came out of retirement to help cover maternity leave for Chelle and Katie. Thanks, Brenda you're a life saver.

HEALTH CARE FOR YOUR HEART!

As part of American Heart Health awareness, we want you to know how important it is to maintain the health of your heart. In fact, heart disease is the leading cause of death in the United States. You may or may not be affected by someone close to you who has heart disease or has had a heart attack, but it is a frightening situation to go through.

So for this month, and for many months to come, please take care of your health and heart. Participate in daily exercise, good eating habits and regular visits to your physician and us, your Family SmileCare team.

Research has shown that periodontal "gum" disease has been linked to some diseases of the heart. It is important to have good oral hygiene by having regular, professional teeth cleanings. This will help to reduce tartar and calculus deposits that trap bacteria in your gum tissue that could directly affect your heart.
